

VICTOR NUNES

soujvnunes@gmail.com | linkedin.com/in/soujvnunes | soujvnunes.github.io

Senior Frontend Engineer with **6+ years** building high-performance web applications in React, TypeScript, and Next.js. Proven track record delivering authentication systems, user account management, and performance optimization (94% build improvement). Recently led frontend development at MetaMatch, mentoring engineers and managing cross-functional teams.

EXPERIENCE

- Head of Frontend Development - MetaMatch (Remote, BR)** *May 2025 - November 2025*
- **Optimized application performance by 94%** reducing Next.js build from 17k to 1k modules, improving TTFB and user experience by migrating from client-side data fetching to React Server Components with static generation
 - **Architected complex state management layer** for real-time market predictions, user balances, and transaction flows using Redux Toolkit, implementing optimistic updates and error recovery patterns
 - Led frontend team execution, mentored engineers on Next.js 15 + TypeScript patterns, and drove technical project management across design, backend, and stakeholder teams; daily user of AI development tools (GitHub Copilot, Claude)
 - Built gamification system with missions, badges, and points tracking integrating GraphQL APIs, improving user engagement and retention
- English Exchange Program - EC Dublin (On-site, Ireland)** *June 2024 - January 2025*
- Completed 6-month English immersion program in Dublin, achieving C1 (Professional) level proficiency
 - Gained firsthand experience with Irish culture and work environment while maintaining technical skills through freelance projects
- Senior Frontend Developer - Polkamarkets Labs (Remote, PT)** *August 2022 - February 2024*
- **Improved application performance by 15%** (Google Lighthouse) through asset optimization, Redux action code-splitting, and strategic CSS refactoring
 - **Contributed to major platform redesign (v2 launch)** including new homepage with full WCAG accessibility compliance and social authentication integration
 - **Introduced Jest unit testing and Storybook component documentation**, improving developer velocity and reducing regression bugs across the engineering team
- Frontend Developer - Gympass (Remote, BR)** *August 2021 - July 2022*
- **Owned QR-code onboarding UI implementation** for Vitalk to Wellz user migration, building responsive React components and collaborating with design team to review Figma mockups

- **Improved developer productivity by 10%** through design system refactor centralizing design tokens and standardizing component patterns with Styled Components

**Junior Frontend Developer - Bepro Network
(Remote, PT)**

*November 2020 - July
2021*

- Implemented responsive pages for Bepro and BetProtocol web applications using React with Bootstrap/Sass
- Integrated authentication flows (MetaMask wallet connections), REST APIs, and improved application performance up to 15%

Junior Developer - Universidade Federal de Alagoas (On-site, BR)

*July 2019 - July
2021*

- **Led frontend development** for Virtual Exhibition platform showcasing university's 60-year history, built with React and Material UI serving thousands of visitors
- Conducted qualitative user interviews and designed user flows with Adobe XD for medical record system targeting School of Dentistry workflows

LANGUAGES

English (C1 - IELTS Academic, EC Dublin) | **Brazilian Portuguese** (Native)

TECHNICAL SKILLS

Core Technologies: React, Next.js 15, TypeScript, JavaScript (ES6+), HTML5, CSS3

State & Data: Redux Toolkit, RTK Query, React Server Components, Server Actions, GraphQL, REST APIs

UI Implementation: Tailwind CSS, Radix UI, shadcn/ui, Styled Components, Material UI, Responsive Design

Testing & Quality: Jest, Vitest, React Testing Library, Playwright, Cypress, ESLint, Prettier, Accessibility (WCAG 2.1 AA)

Performance: Google Lighthouse, Code Splitting, SSR/SSG, Build Optimization, Asset Optimization

AI Development Tools: GitHub Copilot, Claude (Opus/Sonnet), AI-Assisted Development, Code Generation & Refactoring

Development Tools: Git/GitHub, pnpm/npm, Vite, VS Code, GitHub Actions, CI/CD

Collaboration: Agile/Scrum, Sprint Planning, User Stories, Jira, Notion, Slack, Figma, Storybook

Additional: Node.js, Monorepos, Design Systems, Web3 Integration (Ethers.js, Wagmi), Framer Motion
