

Senior Software Engineer with 6+ years of greenfield ownership from architecture to production for European and US startups, specialising in AI-augmented engineering for fintech and Web3 products. Highlights include a Web3 MVP shipped 40% ahead of schedule and a 2.5s TTFB improvement on a live decentralised application.

- **Work Authorisation:** Open to European sponsorship opportunities · Previously resided in Dublin.
- **Current Timezone:** UTC-3 (Brazil) · Flexible to European/US Eastern/Pacific hours.
- **Availability:** Immediate start (remote/contract) · Relocation open (Hybrid/On-site).
- **Compensation**—open to negotiate for a contract or permanent position:
 - R\$25–30k/month (PJ) · R\$20–25k/month (CLT)
 - \$5–8k/month USD
 - €5–8k/month EUR

Work Experience

DevSignal, Delaware, United States

Tech platform facilitating 500+ placements across 21 countries.

Senior Software Engineer (Remote · Part-time contract · May 2026 – Present)

- **AI-first Architecture:** Productised an early prototype into a production Next.js application, designing a server-side-first processing boundary to filter non-candidate documents and cache parsed PDF assessment data, eliminating redundant AI token consumption.
- **Infrastructure & Performance:** Owned full infrastructure end-to-end (GitHub org, CI/CD, subdomain deployment, observability stack); achieved 100% Vercel Speed Insights score.
- **Product Thinking:** Implemented pre-assessment email gate converting free-tool traffic into a stakeholder lead funnel; collaborated directly with client leadership on product spec, architecture, release planning, and branding/SEO design system.

EARNZY Corp., Wyoming, United States

Fintech company with nearly 100 early adopters ready to test a gamified MVP.

Senior Software Engineer (Remote · 2-month Contract · Nov 2025 – Jan 2026)

- **Full Stack Product Engineering:** Architected and delivered the Earnzy App, a greenfield Web3 gamification youth sports MVP, defining the engineering roadmap in an 8-week sprint (Pre-Series Seed Phase).
- **AI-Augmented Engineering:** Delivered production-ready MVP 40% ahead of schedule through AI-augmented development workflows, establishing foundation for future feature velocity.
- **Security & Compliance:** Achieved 100% COPPA compliance for under-13 user authentication by implementing zero-trust architecture with multi-channel parental consent verification and passwordless authentication flows.

MetaMatch, São Paulo, Brazil

Fintech building Palpitada—a decentralised marketplace platform with 1000+ monthly user transactions.

Head of Software Engineering (Remote · 6-month contract · May 2025 – Nov 2025)

- **Technical Leadership:** Oversaw architectural decisions, team experience, and performance standards during Palpitada's 12-week MVP sprint while mentoring and coordinating cross-functional roadmaps with backend and design stakeholders.
- **Platform Modernisation:** Achieved 94% reduction in build complexity (from 17k to 1k modules) and 2.5s TTFB improvement through SSR architecture migration, leveraging optimistic cache updates and SSE to eliminate waterfall requests and redundant data refetching while maintaining real-time UI.
- **Observability & Analytics:** Established proactive issue detection workflow using Microsoft Clarity dead click analysis, shifting 40% of fixes from reactive to preventive before issues generated support tickets.

Polkamarkets Labs, Porto, Portugal

Entertainment DeFi platform where 10,000+ users trade outcome fractions with \$POLK.

Senior Software Engineer (Remote · Contract · Aug 2022 – Feb 2024)

- **Accessibility Leadership:** Delivered Polkamarkets App v2 with full WCAG 2.1 AA compliance across all device types.
- **Performance Optimisation:** Improved Google Lighthouse scores by 15% through code-splitting strategies and asset optimisation in a legacy decentralised prediction market platform.
- **Quality Infrastructure:** Established testing culture through unit and integration testing frameworks, reducing regression rates by 50% and accelerating feature delivery from 5 to 3 days.

Wellhub, São Paulo, Brazil

Global corporate wellness unicorn with 26,000+ mental health support employees.

Software Engineer (Remote · Permanent · Aug 2021 – Jul 2022)

- **Design Systems:** Increased engineering productivity by 10% through design token centralisation and component standardisation, improving cross-team UI consistency.
- **Feature Delivery:** Owned end-to-end QR-code onboarding implementation for major product migration, automating the migration of nearly 500,000 users from Vitalk to Wellz.

Bepro Network, Lisbon, Portugal

Bounty marketplace connecting organisations with 300+ developers for Web3 software development.

Junior Software Engineer (Remote · Contract · Nov 2020 – Jul 2021)

- **Authentication Infrastructure:** Enabled decentralised wallet-based authentication for protocol users, streamlining integration to support BEPRO-token-based service features.
- **Performance Gains:** Achieved 15% improvement in Core Web Vitals through lazy-loading strategies and dynamic asset purging.

UFAL (Federal University of Alagoas), Alagoas, Brazil

NTI supports 26,000+ students, 3,100+ staff, and public-facing data platforms.

Junior Software Engineer (On-site · Contract · Jul 2019 – Jul 2021)

- **Product Strategy:** Delivered an optimised web gallery platform for 500+ visitors under poor network conditions through progressive image loading and animation deferral (Lite Mode).
- **Healthcare Modernisation:** Led UX/UI design and frontend implementation of a role-based (patients, interns, administrators) electronic health record system, replacing paper-based workflows with cloud storage.

Education**EC Dublin**, Dublin, Ireland (On-site · 6-month intensive · Jun 2024 – Jan 2025)

Language proficiency in English (C1/Professional) acknowledged by IELTS Ireland.

IFAL (Federal Institute of Alagoas), Alagoas, Brazil (On-site · 4-year program · Feb 2011 – Dec 2014)

Technical Degree in Information Technology with emphasis in hardware & software development disciplines.

Language Skills

English (C1, Professional Proficiency), **Portuguese** (Fluent).

Technical Skills

AI Development: Claude Code, GitHub Copilot, Lovable, Anthropic API integration.

Core Stack: TypeScript, JavaScript (ES6+), React 19, Next.js 16 (App Router), Node.js, Express.

State & Data: Redux Toolkit, RTK Query, Zustand, React Context API, MongoDB, Mongoose, REST APIs, GraphQL.

Real-Time & Performance: WebSockets, Socket.io, Server-Sent Events, React Server Components, Server Actions, Optimistic Updates.

Design Systems: Tailwind CSS, Radix UI, shadcn/ui, Headless UI.

Design Ops: Figma (Design-to-Code), Storybook, Responsive Design, WCAG 2.1 AA Compliance.

Web3 & Blockchain: Thirdweb SDK, Wagmi, Viem, Ethers.js, Reown (AppKit), MetaMask, WalletConnect, Web3Auth, Ethereum, Chiliz Chain.

QA: Vitest, Jest, Playwright, React Testing Library, ESLint, Prettier, Lighthouse, Microsoft Clarity.

DevOps & Infrastructure: Vite, Webpack, Turbopack, PNPM, GitHub Actions, Vercel, DigitalOcean, Docker.

Compliance & Security: COPPA Regulatory Compliance, Zero-Trust Authentication, Age-Gated Workflows, Passwordless Auth Patterns.

Legacy & Migration: React 16.8 (Class Components), Next.js 11 (Pages Router), SSR/SSG Patterns, Styled Components, CSS-in-JS, SASS/SCSS, Material UI.
